SUBJECT INDEX TO VOLUME 56

Analysis on Error Bounds of Heat Transfer Problems Using the Fast Residual Correction Method, 455
Application of Fourth-Order Explicit Schemes to the Computation of Axisymmetric Swirling Flows of Boussinesq Fluid in Containers with Arbitrary Cross Section, 191

Buoyancy-Driven Flows—Beyond the Boussinesq Approximation, 1

Compartive Study of Heat Flux and Temperature Based Objective Functional to Solve Inverse Heat Conduction Problems, A, 75

Derivation and Physical Interpretation of Level Set Method-Based Equations for Two-Phase Flow Simulations, On, 307
Development of a Novel Improved Differential Approximation (NIDA) for Analysis of Combined Conduction-Radiation Heat Transfer (CCR) in a Two-Dimensional Enclosure with Participating Medium: An Experimental Validation, 231
Direct Numerical Simulation of Isothermal Wake: DNS Noise, Strong Anisotropy Turbulence, and Vortex Dislocation Generation Mechanism, 167

Effect of Conjugate Heat Transfer on Film Cooling Effectiveness, The, 335
Effectiveness and Efficiency of Particle Swarm Optimization Technique in Inverse Heat Conduction Analysis, 119
Efficient Solver for the Algebraic Equations Resultant from Discretization of the Governing Equations for Fluid Flow and Heat Transfer, An, 58

Fast-Running Semi-Implicit Numerical Scheme for Transient Two-Phase Flows on Unstructured Grids, A, 432
Finite-Element Simulation of Incompressible Viscous Flows in Moving Meshes, 38

Galerkin Technique for Transient Radiative Heat Transfer in Finite Thin Media, On, 323

Inverse Identification of Thermal Properties of Charring Ablators, 478

Meshless Local Petrov-Galerkin Method for Nonlinear Heat Conduction Problems, 393

New Formulation for Stress Calculation: Application to Viscoelastic Flow in a T-Junction, 351
Novel Higher-Order Time Integration Method Using the Modified Explicit Green's Approach for Linear Parabolic Problems, A, 211
Numerical Investigation of an Electroosmotic Flow (EOF)-Based Microcooling System, 275

Parallelization of a Simple-Based Algorithm to Simulate Mixed

AUTHOR INDEX TO VOLUME 56
